Ashley: Calorie goals and totals
Yana: Waiting to merge tests
Nicolas: Reset button for weekly planner
Rami: Calories per ingredient and total per recipe
Youssef: Done with his task

Sprint 3 delivery instructions.

1. Plan for this sprint the same way that you did for previous Sprints.
2. Write the user stories for these sprint features (as issues in GitHub); decompose them into tasks, and assign them to team members.
3. When you write a user story for your unique team feature, highlight it in the description and write the corresponding acceptance tests.
4. Write 2 acceptance tests (in GitHub as issues) for the user stories identified in the second sprint. Remember to label them as “acceptance test” (AT) and link them to a user story->task.
5. Develop and implement each feature.
6. Create unit tests for each of the features (sprints 1-2) and ensure that they run automatically on your continuous integration pipeline. Unit tests for sprint 3 will be required in sprint 4.
7. Upload the meeting minutes
8. Each team member must commit a detailed log of their contribution, including time spent on each activity, to their repository.

4. Action Items

- Agree on all issues
- Ask TA for new rubric

5. Next Meeting

Date: 26/27/03
Time: 5:30 P.M
Planned Focus: Sprint #3

6. Extra Meeting for Sprint #3

Date: 26/26/03
Time: 4:00 P.M
Planned Focus: Sprint #3
